

HOW TO REGISTER YOUR PUBLICATION ON THE INSTITUTIONAL REPOSITORY

1 >

If your publication is an open access journal article or book chapter, please e-mail the URL link to us. If a full text is not available, a pdf file of the article is also required.

2 >

If a conference article / abstract or a book chapter is not accessible on the Internet, please submit two pdf files: one for the article and another for information about the publication in which it was published (all pages of the book from the title page to the first article page – publishing details, scientific committee, content, etc.). If you have a full publication as a pdf file (e.g., a book of abstracts), please also attach it for our reference.

3 >

Conference participation can only be registered on the repository if a book of abstracts or conference proceedings are available in paper or digital form.

4 >

Please provide the following additional information, if it is not specified in the publication:

- a) the department(s) / research group(s) you are affiliated with, especially in those cases when only the name of the university is referred to in the publication;
- b) the field(s) your research belongs to;
- c) indicate if your name has changed and is different from the one in the publication;
- d) at least 3 keywords.

5 >

When you receive an automatic e-mail message informing you that your publication has been registered, please review the record to check if the details about field(s) of research and affiliations are correct. Please notify us if you find the details inaccurate.

6 >

If you have not received an automatic e-mail message, you can check if your publication has been registered via KTU Virtual Library at <https://vb.ktu.edu> (the record is visible on the following day after it is made) or by accessing your user account at <https://talpykla.elaba.lt/>.

7 >

You can generate a list of your publications at <https://www.elaba.lt/> → Generate reports → Select report → KTU PDB institutional reports → 2. Lists for attestations and competitions.

8 >

To register your publication please contact institutional repository managers: Rita Jašmontienė at rita.jasmontiene@ktu.lt – Natural, Technological and Medical Sciences (NTM) or Edita Ražanskaitė at edita.razanskaite@ktu.lt – Humanities, Social Sciences and Arts (HSA).
