

How to find resources for engineering disciplines and physical sciences

The Library of Kaunas University of Technology
biblioteka@ktu.lt

Stages in the search for information

Identifying information needs

Before beginning to write scientific work:

- ✓ conduct information search;
- ✓ look for the information in encyclopedias, reference books and dictionaries;
- ✓ look through books, scientific articles (carry out search in databases).

Collected information should help you:

- ✓ to reveal wider and narrower spheres of the topic;
- ✓ to describe the aim and problem;
- ✓ to find concepts, terms and their synonyms, which while looking for information could be used as keywords.

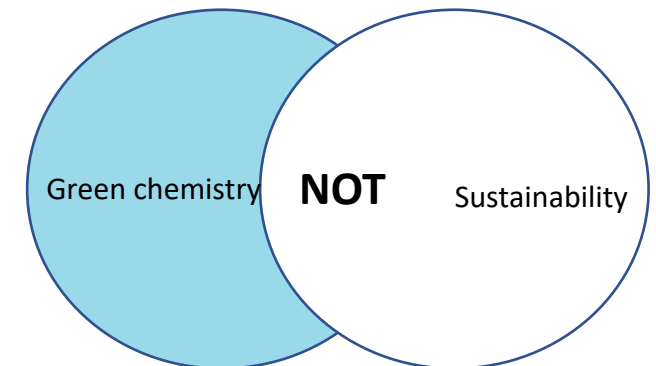

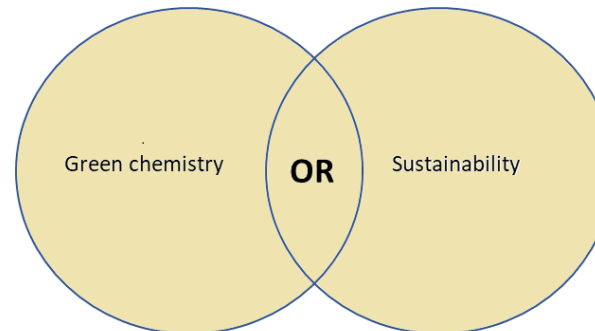

Before carrying out a search of information, answer these questions:

- ✓ How recent does the information need to be?
- ✓ What type of information sources do you need?
- ✓ What sort of information sources do you need?
- ✓ What format of information is necessary?
- ✓ Which languages will you use for the search?
- ✓ How much information do you need?
- ✓ How much time will you devote to research?

Searching for information (Boolean operators)

- ✓ State the essence of information search in one or two sentences, highlight the specifics of the topic;
- ✓ identify keywords and distinguish main concepts and terms;
- ✓ select synonyms and different forms of the words, alternative terms;
- ✓ use logical operators (Boolean logic) (AND, OR, NOT, * , „ “ , ?).

Various information publications:

encyclopedias, reference books,
dictionaries

➤ dictionaries and encyclopedias available
online:

- ✓ [AccessScience](#)
- ✓ [Dictionary.com](#)
- ✓ [Encyclopedia.com](#)
- ✓ [Online Translation Tools](#)
- ✓ [Reference.com](#)
- ✓ [Word Web Online](#)

Thesauri (general or specific field
dictionaries, which show meaningful
connections between words):

- ✓ [Thesaurus.com](#)
- ✓ [EUROVOC](#) – the translations of terms in
four languages, topic by topic and
alphabetical dictionary
- ✓ [Merriam-Webster](#)
- ✓ [UNESCO Thesaurus](#)
- ✓ Academic Search Complete (through
EBSCO) the list of terms related to the
subject
- ✓ [IEEE Approved Indexing Keyword List](#)
- ✓ [LiDA Dataverse repository](#)
- ✓ [Free Dictionary](#)

Mind map

Mind mapping software tools:

- [Coggle](#)
- [Mind Manager \(Mindjet\)](#)
- [MindNode](#)
- [XMind](#)

Mind map helps to understand content, see connections among different objects, develop idea, theme, identify possible main concepts / search terms.

Advice

- ✓ It is very important to keep balance between quantity and quality.
- ✓ There is no right solution, best search tool or the only keyword.
- ✓ You can change your search strategy. Write down selected keywords, search tools, etc.
- ✓ Save the relevant documents and information about them and make notes.
- ✓ You can always ask a librarian for advice.

Choosing a search tool

- ✓ library e-catalogues and virtual libraries;
- ✓ institutional publication ETD (Electronic Thesis or Dissertation) databases;
- ✓ databases;
- ✓ subscribed databases;
- ✓ open access resources;
- ✓ specialised search systems.

Selection of resources

The aspects of information quality:

- ✓ reliability
- ✓ the authorship of the resource;
- ✓ resource;
- ✓ newness;
- ✓ publisher;
- ✓ sources cited.

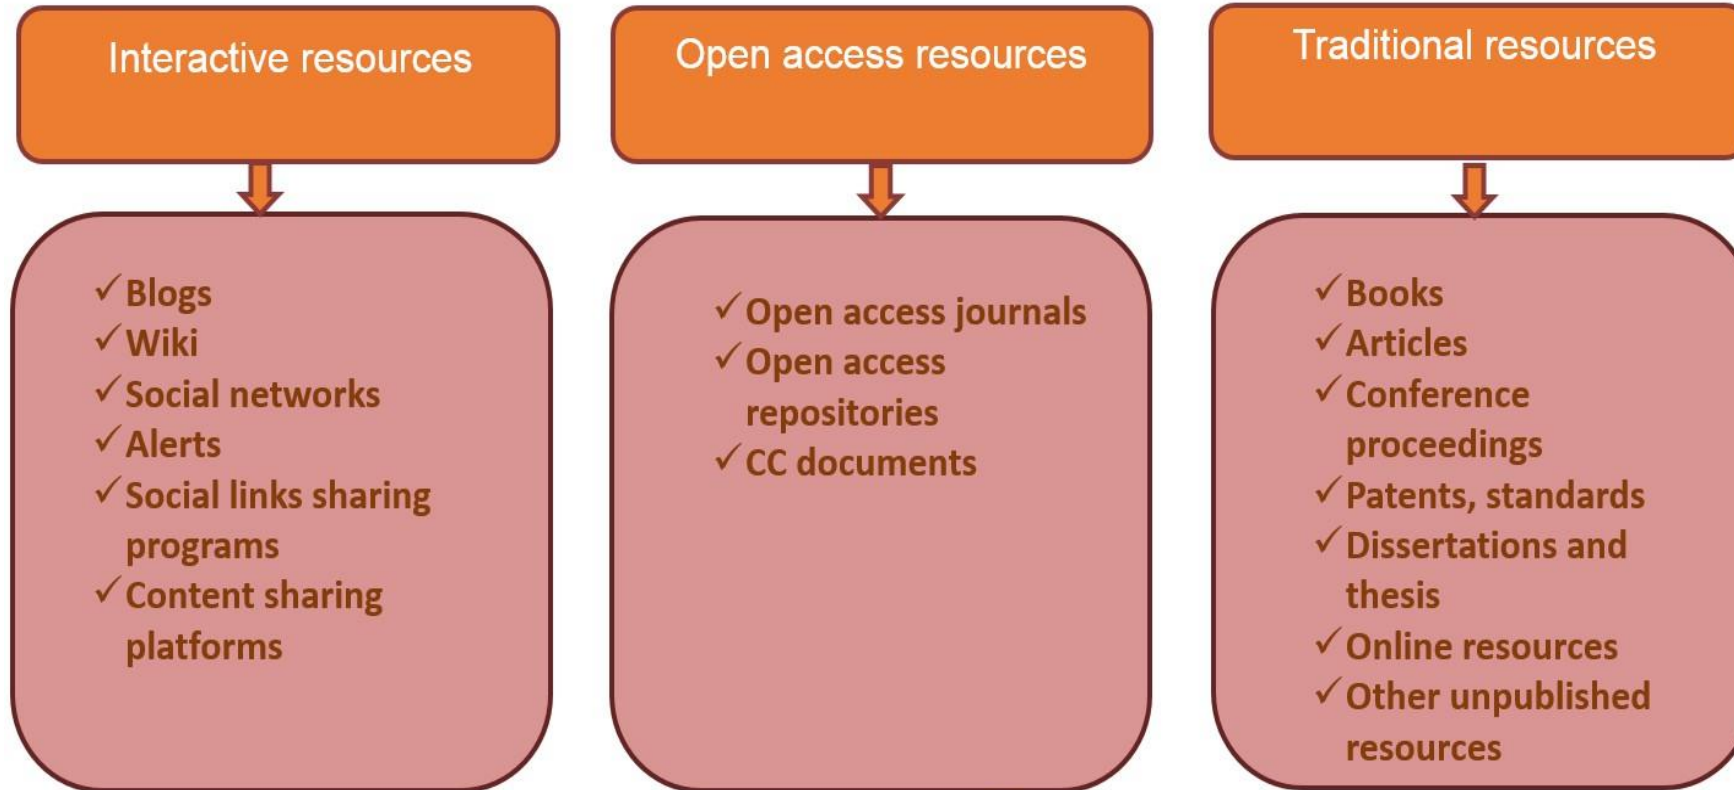

Revision of the search

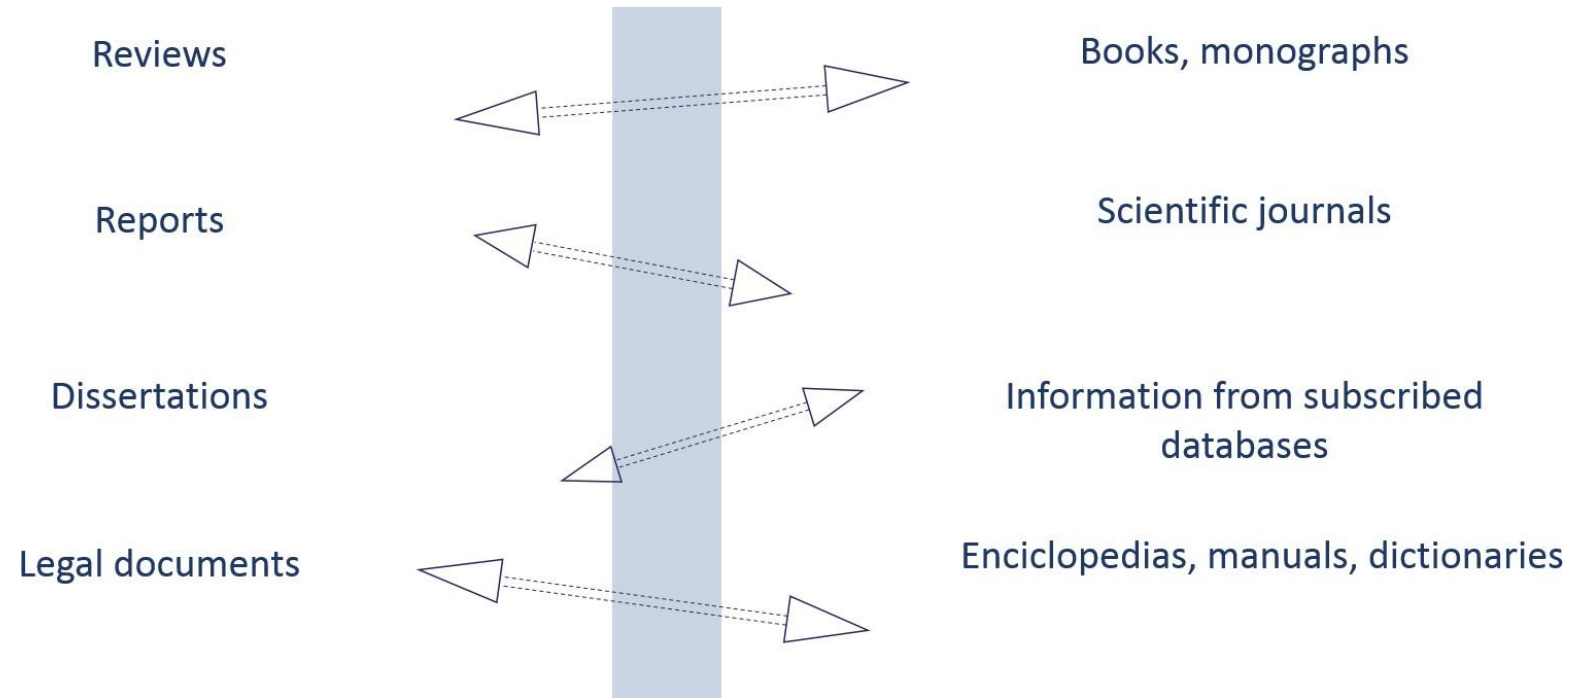

The search is the process that may be repeated. If the results of the search do not satisfy, it is advised:

- ✓ to look through the spelling of the keywords;
- ✓ to check other keywords;
- ✓ to evaluate the suitability of the chosen tool;
- ✓ to repeat the search from the first step.

Variety of information resources

Which resources can be used?

Where to begin the information search?

The library offers:

- KTU library catalogue biblioteka.ktu.edu
- KTU virtual library vb.ktu.edu
- Subscribed databases
- Open access resources

DOAJ DIRECTORY OF

JOURNALS

Search in KTU Virtual Library

Search based on one slot principle where information needs to be typed in to find all resources of KTU library

The screenshot shows the top navigation bar of the KTU Virtual Library website. The navigation bar includes the KTU logo (kaunas university of technology, 1922) on the left, and several menu items: New Search, Help, Tags, eJournals, and a three-dot menu. On the right side of the navigation bar, there are icons for QR code, a pushpin, a 'Sign in' button (circled in blue with an arrow pointing to it), a UK flag, and a 'Menu' dropdown. Below the navigation bar is a search bar with the placeholder text 'Search anything'. To the right of the search bar is a dropdown menu labeled 'Library and Other Resources' (with an arrow pointing to it), a microphone icon, a magnifying glass icon, and the text 'ADVANCED SEARCH'. The dropdown menu is open, showing a list of resources: 'Library Catalogue', 'Science Publications (KTU eLABa PDB)', 'Electronic Theses and Dissertations (KTU eLABa ETD)', and 'Institutional Repository'. Below the search bar, there are several content blocks: 'About KTU virtual library (KTU VL)' with a description, 'KTU VL on' with a short link 'vb.kt', 'VB Help', and 'To search – sign in' with a 'Read more' link.

Subscribed Databases

[Resources - Library | KTU](#)

Databases according to topics

Databases

- Free trial databases
- Reference management tools
- Information for users
- Catalogue
- KTU Virtual library
- Study modules literature search
- Lithuanian Academic Electronic Library eLABa
- Institutional repository KTU ePubl
- KTU research journals
- E-journal publishers apply discounts for KTU university researchers

For information on accessing subscription databases from home, click [here](#).
We recommend that you do not use the Google Chrome browser to access the databases.

Databases and descriptions according to the alphabet

A

Academic Search Ultimate (EBSCO) – offers the combination of academic journals, magazines, periodicals, reports, books and videos meets the needs of scholars in virtually every discipline ranging from astronomy, anthropology, biomedicine, engineering, health, law and literacy to mathematics, pharmacology, women’s studies, zoology and more.

AccessEngineering – an engineering reference tool for professionals, academics, and students that provides access to the collection of authoritative, regularly updated engineering reference information. Access Engineering also comprises dynamic online features, such as instructional, faculty made videos, calculators, interactive tables and charts. [More](#).

ACM Digital Library – the ACM Digital Library is a research, discovery and networking platform containing publications, including journals, conference proceedings, technical magazines, newsletters and books covering the

Access to subscribed databases

The subscribed databases can be accessed via KTU computer networks. If you want to use the databases at home (not from the computers of KTU network), you can choose among the following:

- [Remote access \(EZproxy\)](#). Using remote access, KTU members can log in using a unanimous username and password.
- [KTU Virtual Library](#).

The users are allowed to:

- use electronic resources for studies or research without infringement of copyright laws
- use electronic resources (download/print/copy to an external hard drive) only for personal usage and in small quantities. In case user downloads too many resources his IP address might be blocked by database providers.

Users are forbidden:

- to use the software that allows to download and save information on the computer.
- to upload the information from the subscribed databases online; to share the information with the third parties or to use the information for commercial purposes.

The search of books in databases

[AccessEngineering](#): engineering science e-books from the fields of electronics, mechanics, building, environment engineering, energetics, industry, business and communication.

[eBook Academic Collection](#) (EBSCO Publishing): database of e-books with various topics.

[eBook Open Access \(OA\) Collection](#) (EBSCO Publishing): This is the set of books of various disciplines, created in collaboration with university press and open resource publishers. It gives access to more than 2,500 e-books on various topics.

[ProQuest Ebook Central](#) (previously called *Academic Complete*): more than 200 thousand books of technological, physical, biomedical, social and humanity sciences.

[ScienceDirect E-Books](#): full collection of e-books of various scientific fields.

[Springer LINK E-Books](#): these books can also be found in library catalogue.

[Wiley Online eBooks](#): access to e-books on the topics related to finances, marketing, engineering, physics, informatics, chemistry and other sciences.

The search of articles in databases

[Academic Search Ultimate](#) (*EBSCO Publishing*): a database with various topics, which gives access to resources in astronomy, anthropology, biomedicine, engineering, health, law, mathematics, pharmacology, women studies, zoology and other topics. The access is given to full text scientific journals, reports, books, video, etc.

[Emerald Premier eJournals Collection](#): full text journals in social and engineering sciences.

[ScienceDirect Journals](#): more than 2,000 full text scientific journals from various fields of science. Subscribed content is marked by a green square.

[Springer LINK Journals](#): scientific journals of publishing houses *Springer Verlag* and *Kluwer Academic Press* on various topics.

[Taylor & Francis](#): scientific journals published by *Taylor & Francis* publishing group on various topics. Access from 1997 until now.

[Wiley Online Library](#): access to *Wiley* publishing house journals. Access to [483 journals](#) until 2013, as well as SSH (Social Science and Humanities [370 journals](#)) and STM (Science Technology Medicine [417 journals](#)).

[Nature](#): access to four subscribed, highly-regarded, weekly journals on physical and engineering sciences (access is granted to the volumes from 2006 till now).

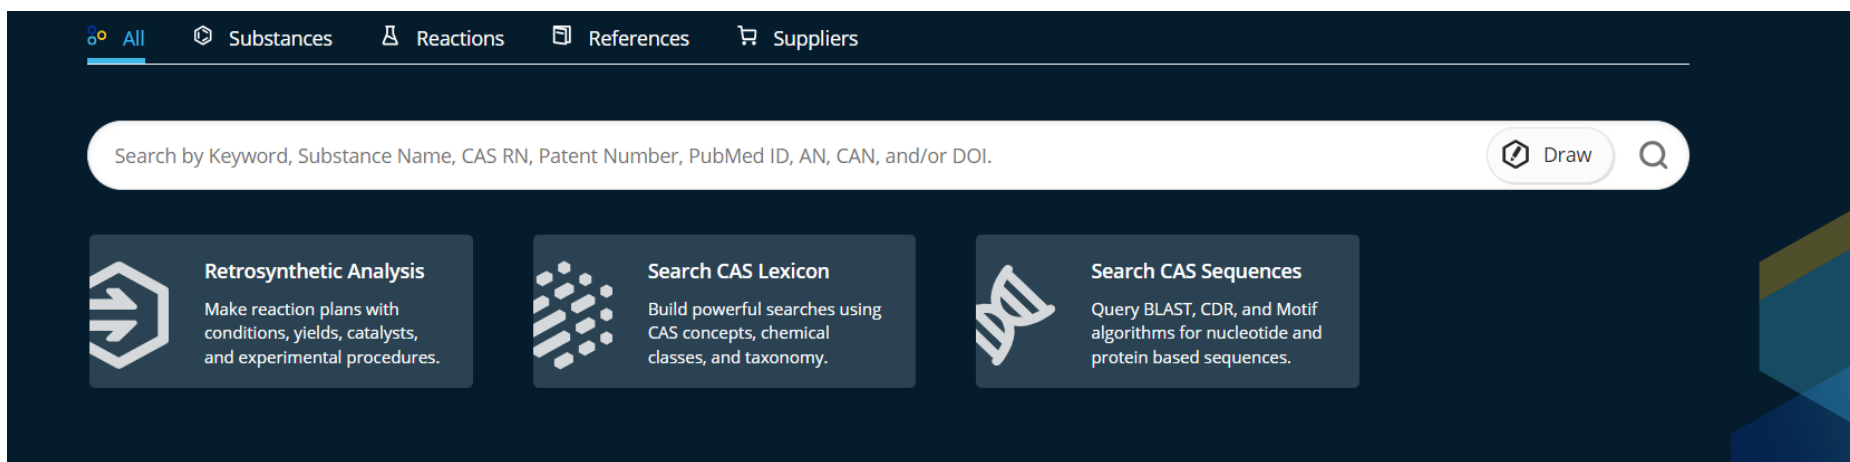

The search of articles in specialized databases

[IEEE Xplore](#): journals, conference material, standards and other printed material published by Institute of Electrical and Electronics Engineers (IEEE) and Institution of Electrical Engineers (IEE) since 1988 and individual printed material since 1950. Topics: electrical engineering, electronics, engineering, technologies, etc.

[Reaxys](#): a unique web-based chemistry database consisting of deeply excerpted compounds and related factual properties, reaction and synthesis information as well as bibliographic data, navigated and displayed via an actionable interface.

[SciFinder-n](#): database of chemistry, which provides information about materials, including their chemical reactions, chemical names, properties, commercial availability and regulation, chemical reactions, patents (*PatentPak*) [Read more](#).

[IOP science](#): the publishing house of the Institute of Physics (IOP) publishes journals on physics and physical sciences.

The screenshot shows a dark-themed search interface for a chemistry database. At the top, there is a navigation bar with icons and labels for 'All', 'Substances', 'Reactions', 'References', and 'Suppliers'. Below this is a large white search bar with the placeholder text 'Search by Keyword, Substance Name, CAS RN, Patent Number, PubMed ID, AN, CAN, and/or DOI.' To the right of the search bar are icons for 'Draw' and a search magnifying glass. Below the search bar are three feature cards: 'Retrosynthetic Analysis' (with a hexagonal icon and text 'Make reaction plans with conditions, yields, catalysts, and experimental procedures.'), 'Search CAS Lexicon' (with a grid icon and text 'Build powerful searches using CAS concepts, chemical classes, and taxonomy.'), and 'Search CAS Sequences' (with a DNA helix icon and text 'Query BLAST, CDR, and Motif algorithms for nucleotide and protein based sequences.').

The search in open access resources

ktu

Google books <http://books.google.com>: full text books read just online, they cannot be downloaded, printed or saved.

DOAB (*Directory of Open Access Books*) <http://www.doabooks.org>: open access resource to the catalogue of books.

InTech Open <http://www.intechopen.com/books>: the publishing house of technological, physical, medicine and other science books with open access.

DOAJ (*Directory of Open Access Journals*) <http://www.doaj.org>: open access journal catalogue. The journals included in this catalogue ensure free access to full text articles. This catalogue includes more than 13,000 journals.

HighWire Press <https://portal.highwire.org/lists/allsites.dtl>: is created and supervised by Stanford University in the USA. Open Access journals marked as free.

The search for articles in open access resources

National repository: The Lithuanian Academic Electronic Library ([eLABa](#)).

ArXiv.org <http://arxiv.org>: designated to physical sciences (physics, mathematics, informatics, etc.), but you can also find documents suitable for engineering sciences.

BioMed Central <http://www.biomedcentral.com>: open access journals of medicine, biology, biomedical engineering and biotechnology, e.g. BioMedical Engineering OnLine, Biotechnology for Biofuels, BMC Biotechnology, Journal of Biological Engineering, Journal of Biomedical Science, Journal of Nanobiotechnology, etc.

CiteSeerX <http://citeseerx.ist.psu.edu>: information resource of computers and information sciences, which is suitable for informatics, electrical and electronics engineering and other fields.

PLoS Public Library of Science <http://www.plos.org>: open access journals of biomedical sciences, where the information suitable for biotechnological field could be found.

The search engines of scientific information

[Google Scholar](#) : a worldwide scientific information search engine.
Reviewed resources (articles, dissertations, books, summaries, etc.)
from different fields of studies.

[Dimensions](#): a scientific information search engine.

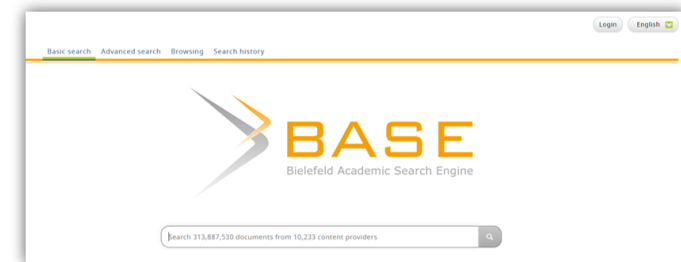

Open access resources are marked by “Open Access”.

[BASE](#): scientific information search engine.

Open access resources are marked by “Open Access”.

[Core \(Connecting Repositories\)](#): the world's most voluminous search engines
which provides an open access to scientific documents from repositories and to a collection of journals.

[WorldWideScience](#): a global science gateway comprised of
national and international scientific databases and portals.

The search of standards

- ❑ [Lithuanian Standards Board \(LST\) Standards Catalogue](#) is accessed through KTU Virtual library or Library Catalogue.
- ❑ The International Organization for Standardization (ISO) <http://www.iso.org>
- ❑ European technical standardization system:
 - ✓ The European Committee for Electrotechnical Standardization (CENELEC) <https://www.cenelec.eu/about-cenelec/>
 - ✓ The European Committee for Standardization (CEN) <https://www.cenelec.eu/about-cen/>
 - ✓ The European Telecommunications Standards Institute (ETSI) <http://www.etsi.org>

 There are various programs which use AI to look for articles, e.g.: *Semantic Scholar, Elicit, Litmaps, research Rabbit, Keenious, etc.*, yet they are not licensed by Kaunas University of Technology and their use is your own responsibility.

Advice

If you know something about the topic you are researching and you can evaluate the content generated by AI, you can, for example:

- ✓ to ask AI to offer you keywords which are related to your topic;
- ✓ to get new views about the topic.

Attention! Don't forget to evaluate the resources!

Even though with the help of AI you found the resource which really exists (webpage, article, etc.), it can be unsuitable to use.
